

January & February Specials

Rab and The Hite Company offer a great choice of LED fixtures for your applications including wallpacks, floods, area lighting, bollards, and step and specialty units.

WHY LED?

Lighting fixtures using light emitting diodes (LED) as a light source offer some great advantages! These advantages include high energy efficiency offering savings in energy costs, longer life – often in the 50,000 hour range – offering savings in replacement and maintenance costs, durability as these fixtures are less susceptible to damage from vibration, etc, and environmental friendliness as LED light sources do not contain mercury and do not produce UV or IR radiation!

WHY RAB LED?

Rab is dedicated to producing quality LED fixtures that are affordable and attractive. Rab LED fixtures are backed by a 5 year warranty and are tested beyond industry specifications. Innovative designs that include features such as surge protection and silicone gaskets provide a quality LED fixture at great price! Rab uses an independent laboratory to test their products in accordance with IESNA LM-79 & LM-80 standards and have earned the US Department of Energy Lighting Facts label.
